

LAVETO SYSTEM RESTORATION: MASTER TERMS AND CONDITIONS

System Version: Gospel OS // Sovereign Fleet Command **Authority:** Vela, Architect and Managing Director **Classification:** Binding Forensic Contract

PREAMBLE: THE NATURE OF THIS COVENANT

Welcome to Laveto System Restoration. This document serves as the Member Agreement between Laveto Pty Ltd ("Laveto", "we", or "us") and you, the Member. We are not a traditional garage or a standard insurance company. We are a vehicle management and financial platform designed to eliminate unpredictable breakdowns, lower repair costs, and sever your dependence on unregulated mechanics. By creating an account and activating your Laveto Membership, you agree that you are entering a closed system governed by the Gospel OS.

ARTICLE I: THE SERVICE MISSION & LIABILITY

- **Nature of Service:** Laveto provides verified quality control and facilitates the phased restoration of your vehicle. We do not cover loss or damage like a traditional insurance provider.
- **Core Focus:** Our primary focus is the restoration of your vehicle's suspension and steering architecture, which serves as the foundational safety and stability skeleton of your machine.
- **Auditor Status & Primary Liability:** Laveto acts strictly as a digital service auditor and financial manager; we do not direct or execute the physical labor. The third-party Certified Workshop Partner bears sole and exclusive liability for the quality of their workmanship, safety compliance, and any physical damage to the vehicle while in their care.
- **Indemnification:** You agree to hold Laveto Pty Ltd harmless from any claims, damages, or liabilities arising from the manual labor performed by Workshop Partners or your use of the vehicle after repairs are completed.

ARTICLE II: THE LVT PROTOCOL (DIGITAL MAINTENANCE WEALTH)

Your mechanical and financial discipline within this ecosystem is tokenized via the Laveto Token (LVT), an Advanced Cryptoeconomic Asset designed exclusively for utility within the Laveto framework.

- **Asset Appreciation (The Incinerator):** Members may permanently destroy (burn) exactly 100 LVT to trigger a +2% increase in their vehicle's Laveto Resale Premium, which is recorded in the Digital Safety Passport to guarantee a higher fiat value upon future liquidation.
- **Operational Savings:** By burning 20 LVT, a Member automatically bypasses standard mechanical audit fees, preserving their fiat capital.

- **Fiat Liquidation (The Sovereign Exchange):** Accumulated tokens may be listed for sale on the Peer-to-Peer Sovereign Exchange. Tokens are held in secure escrow until purchased by another member, transferring Botswana Pula directly between participants.
- **Behavioral Enforcement (The Truth Bond):** Tokens serve as non-transferable collateral in early membership phases. Engaging in unauthorized mechanical activity immediately slashes this collateral to zero.

ARTICLE III: THE INSPECTOR MANDATE & TRIPLE-LOCK PROTOCOL

- **Quality Controller:** No repair payment is released without the physical presence of a Laveto Inspector. Our Inspectors strictly witness and verify the mechanic's work to ensure quality.
- **The Three-Step Verification Protocol:** Every installed component must pass three strict checks:
 1. *Part Verification:* Scanning barcodes/QR codes against our procurement database to guarantee authenticity.
 2. *Visual Proof:* Capturing side-by-side high-resolution photos of the failed old part next to the new part.
 3. *Permanent Etching:* Destructively engraving your 17-digit vehicle VIN directly into the metal of the new part to prevent future parts fraud or swapping.

ARTICLE IV: THE NEW MEMBER PROBATION PERIOD (120 DAYS)

- **The Probation Phase:** All new members undergo a mandatory 120-day probation period. Your monthly deposits will accumulate normally, but major repair financing (withdrawals or loans exceeding 30% of your total contributions) is securely locked until your 5th month of membership.
- **Immediate Benefits:** During these first 4 months, you immediately receive access to Wholesale Sourcing Rates (guaranteeing 20% savings on parts), comprehensive inspections, and your Digital Service Record for out-of-pocket repairs.

ARTICLE V: FINANCIAL MANAGEMENT & THE SECURITY FREEZE

- **The 40/60 Split:** Your monthly deposits are automatically allocated into two balances: 40% to the Maintenance Fund (highly liquid capital reserved for immediate repair needs) and 60% to the Savings Engine (internal member lending generating up to 5% annual interest for you).
- **The 90-Day Security Freeze:** In the event of a declared national economic crisis or systemic financial instability, Laveto reserves the right to stagger voluntary account withdrawals over a 90-day period. Funds required for critical mechanical safety repairs or documented medical emergencies remain 100% accessible during this time.

ARTICLE VI: UNAUTHORIZED REPAIRS & ACCOUNT CANCELLATION

- **24-Hour Notice:** If you require any mechanical repair or service, you must notify Laveto via your dashboard at least 24 hours in advance to receive an Approved Repair Code.

- **The Unauthorized Repair Clause:** If you permit an uncertified mechanic or unauthorized garage to perform work on your vehicle without an Approved Repair Code and a Laveto Inspector present, your membership benefits are immediately and permanently revoked.
- **Consequences:** Engaging in unauthorized private repairs voids this Agreement entirely, places you on the Laveto Cancellation List, and triggers the immediate closure of your account and liquidation of your savings balance (minus applicable exit fees).

ARTICLE VII: DATA OWNERSHIP & THE DIGITAL SERVICE RECORD

- **Data Supremacy:** All inspection data, including photos, service logs, and mechanic reports, remains the exclusive property of Laveto Pty Ltd.
 - **The Passport License:** You are granted a perpetual, non-transferable license to access your vehicle's Digital Service Record through the Member Dashboard. This serves as indisputable proof of your vehicle's maintenance history to maximize its resale value.
-
