

SOVEREIGN ASSET DNA (VIN):	46665478388877777
APPROVED PILOT / MEMBER:	Theo SethapeLo
VEHICLE CLASS DESIGNATION:	CLASS A
CORPORATE COHORT / INSTITUTION:	INDIVIDUAL
AUTHORIZED FUNDING METHOD:	EFT
DATE OF INDUCTION:	27 June 2026

I. THE ZERO-TRUST PROTOCOL

The Member acknowledges that Laveto System Restoration strictly utilizes the internal "Silk Road" procurement engine to secure Tier-1 and OEM equivalent components. The installation of unauthorized, aftermarket, or externally sourced parts ("mechanical malware") by the Member or third-party entities is strictly prohibited and will immediately void all system guarantees and asset health scores.

II. THE FINANCIAL RESERVOIR & YIELD ENGINE

The Member agrees to the automated monthly deposit based on their assigned Vehicle Class and authorized Funding Method. 100% of this deposited capital is allocated directly to the Member's personal portfolio, structured strictly on a 60/40 fractional split: 60% is directed to the compounding Yield Engine (Savings Equity), and 40% is secured in the Shield Reservoir for future maintenance and compliance tolls.

III. THE PROVENANCE PREMIUM

Laveto operates on clinical margins, securing Tier-1 components at wholesale cost without applying retail markups during active repairs. In exchange for maintaining this Zero-Trust integrity, in the event of asset liquidation (sale) facilitated by the Laveto Public Registry, Laveto retains a 15% Provenance Premium on the final sale price to compensate for the certified, mathematically proven maintenance history provided to the buyer.

IV. DATA SOVEREIGNTY & TELEMETRY

The Member grants Laveto System Restoration full and immutable rights to capture, catalog, and store 4K forensic telemetry, including the Triple-Hero Profile (Stance, Heart, Sanctity) and detailed component inspection data. This data is utilized solely to maintain the integrity of the Sovereign Registry and protect the asset's market valuation.
